Do you want to make the transition to Windows 7? Or maybe you're just tired of the appearance of Windows XP? You want to play the new version with older programs? No worries, here are three ways to get the latest version of Windows XP on your PC. Update Windows XP to Windows 7 If you want to make the transition to Windows 7, then it's the ideal time for you to upgrade to the latest version of the operating system. While you are at it, you can also update the Windows application you are currently using. Start the installation by using your personal computer. After this, choose 'Search Windows updates' and press Enter. Choose a suitable update, select 'Install updates', and press Enter. It's very important that you keep in mind that your PC is ready to make the jump. There are three ways to make the transition to Windows 7 and we'll provide you with a brief overview of each one. Update to Windows 7 by using Windows Media Player Windows 7 is the seventh version of Microsoft's operating system for home computers. Thanks to the Media Center application, you can switch your PC to Windows 7 using the following procedures: - Insert the installation CD. - Choose 'Install this copy of Windows'. - Choose the date when you want to make the transition to Windows 7, and press Next. - Choose the destination for the new Windows installation. - Choose 'Install'. - Choose 'I have read and accept the license terms for this copy of Windows'. - You will be prompted to choose a username and password. - Press Next. - Press Finish. - Start the installation, as usual. - After the installation is complete, restart your PC. Update to Windows 7 by using Windows Update The second way of updating Windows 7 is by using the software update center, the basic module of Windows. Using this module, you can search for and download the latest updates of your computer. Once you have installed Windows 7, you can easily access the update center. Just look for the 'Windows Update' icon in the notification area. Once the update is done, you need to restart your PC. Make a backup of your files The last, but not the least, way to make the transition to Windows 7 is to carry out a backup of your files. In this case, you need to create a system image using the Windows Backup tool. You can perform the backup when you have Windows 7 installed, and restore it when you need to make the transition to the new version of the operating system
